

**Table 4.** Logistic regression analysis for the prediction of perinatal death (n=12) using estimated fetal weight centile (EFW), cerebroplacental ratio (CPR) pulsatility index (PI) multiple of median (MoM), uterine artery Doppler (UtA) PI MoM

<b>variable</b>	<b>Odds ratio (OR)</b>	<b>95% confidence interval</b>	<b>P value</b>
EFW centile	0.957	0.93-0.99	0.003
CPR PI MoM	1.969	0.14-27.63	0.615
UtA PI MoM	13.10	1.95-87.89	0.008
